

Safety Council Solutions

Contractor Data Management & Safety Program Audits

Safety Council Solutions (SCS) is a joint venture of the Safety Council Texas City (SCTC), Industrial Safety Training Council (ISTC), and Safety Council Southwest Louisiana (SWLA). Our combined 100 years of industry experience, our proven history of cost containment, as non-profit providers, the 30 plus years our Directors have of direct control over their organizations and our ability to provide sophisticated enhancements was the basis for selecting us to provide these services.

Experience:

- SCS has written over 4,000 Safety Program Modules.
- Over 2,500 Contractors have been assisted through the SCS Process.
- A state of the art database with a highly qualified Information Technology (IT) provider committed to technical support.
- Our auditors are formally experienced Owner/Operators who live and work in the same community as our contractor customers and owners.

Database Features:

- Password Protected.
- Fields include contact information, OSHA Citations, OSHA Fatalities, Desk-Top Audit Scores, training status and Contractor Safety Questionnaire.
- Searchable contractor data, including contractor name, Federal Tax ID, and Work Type.
- Information easily downloads to Excel, Word, or PDF.
- Owners have the ability to email directly to contractors from the system.
- Data input from contractors via mail or electronic submittal (CD or PDF file).
- Owner/Operator notification when Contractor has not updated their OSHA/EMR data.
- Customization of data as well as inclusion of the requirements set by our Owner/Operators. The information can be site specific or specific to a corporation or even a region of the country.

Audits:

- Performed by trained and qualified personnel.

- Normally completed within a 3 day turnaround period.
- Scoring based on items completed from each required program defined by the safety program matrix.
- SCS will validate contractor submitted OSHA data against OSHA database.
- Ability to manage workload of up to 40 quality audits in a two week turnaround period.
- Automatic notification to Owner/Operator for contractors who fail to self report OSHA fatalities and citations annually.

Fees:

As a non-profit group with a history of quality cost and effective service, we will continue to assure that our services meet your needs and our fees are competitive.

Assistance:

Contractor Support is provided by SCS via on-line help with detailed, item specific help provided by a full-time Administrator.

Support Available:

- Monday-Friday: 8:00a.m.-4:00p.m.

SCS has its own IT Resources, both internally and externally, to support and meet our customer's needs.

Special Services Offered:

- Hands on field audits.
- A reciprocal Pre-Qualification Form (PQF)
- A customizable (company specific) PQF can be developed upon request.
- A listing (web posting) of Owner/Operator requirements on regional or corporate basis.

SCS is at your service with a proven record of stability, established Petrochemical relationships and customization of databases. We look forward to serving your needs now and in the future. We pride ourselves on taking care of our customers and look forward to being the "Solution" for your database verification, audit and support needs.
