OSHA Education Training Center: (866) 906-9190

Permit-Required Confined Space Entry (OSHA 2264)

Date: 2/7/17 to 2/9/17

Price: \$595

Hours: 22.00

CEUs: 2.20

This course covers the safety and health hazards associated with permit-required confined space entry. Course topics include recognition of confined space hazards, identification of permit and non-permit required confined spaces, use of instrumentation to evaluate atmospheric hazards, ventilation techniques, developing and implementation of a confined space program, proper signage, and training requirements. This course features workshops on permit entry classification, instrumentation and program development.

Machinery and Machine Guarding Standards (OSHA 2045)

Date: 4/4/17 to 4/7/17

Price: \$595

Hours: 26.00

CEUs: 2.60

This course covers the various types of common machinery, machine safe guards, and related OSHA regulations and procedures. Guidance is provided on the hazards associated with various types of machinery and the determination of proper machine safe guards. Course topics include machinery processes, mechanical motions, points of operation, control of hazardous energy sources (lockout/tagout), guarding of portable powered tools, and common OSHA machine guarding violations. Program highlights include the ability to recognize hazards and provide options for control and hazard abatement through machines safeguarding inspection workshops.

Hazardous Materials (OSHA 2015)

Date: 4/11/17 to 4/14/17

Price: \$595

Hours: 26.00

CEUs: 2.60

This course covers OSHA General Industry Standards and other consensus and proprietary standards that relate to the use of hazardous materials. Course topics include flammable and combustible liquids, compressed gases, LP-gases, and cryogenic liquids. Related processes such as spraying and dipping and use of electrical equipment in hazardous locations are also discussed. Upon course completion students will have the ability to assess compliance with OSHA hazardous materials standards, determine hazardous (classified) locations, and proper moving, storing, and handling of hazardous materials.

Cranes in Construction (OSHA 2055)

Date: 5/23/17 to 5/25/17

Price: \$595

Hours: 22.50

CEUs: 2.25

This course covers the requirements for operation of cranes in the construction industry using the OSHA construction Cranes and Derricks Standard as a guide. Course topics include hazards associated with crane assembly and disassembly, types of cranes, lifting concepts, rigging and wire rope, signaling, employee qualifications and training, and maintenance, repair, and inspection requirements. Students will participate in workshops to reinforce concepts of safe crane operation. Upon course completion students will have the ability to identify the types of cranes and their components and attachments, determine safe operating conditions, and recognize common violations of OSHA Standards.
